Doc Smith's Time Circuits – User Guide

Created in 2025 to celebrate 40 years of *Back to the Future*, this plugin brings Doc Brown's iconic dashboard to your website — a playful yet professional nod to time, creativity, and imagination.

Whether you're building a fan page, a portfolio, or a project inspired by classic cinema, *Doc Smith's Time Circuits* makes your site stand out with style and nostalgia.

- Authentic **Time Circuits interface** (Destination, Present, and Last Departed Time)
- Responsive design — looks perfect on any device
- Customizable colours and glow effects
- DYMO-style **control panel buttons**
- Lightweight and optimized for modern WordPress themes

Compatibility

Tested with:

- **Impreza**, **Flatsome**, and major page builders (WPBakery, Elementor, Gutenberg)
- Works great with **WooCommerce** and **custom pages**

Installation

1. Upload the ZIP file via *Plugins* → *Add New* → *Upload Plugin*
2. Activate it
3. Add shortcode `[time_circuits]` to any page or post

2. Layout & Themes

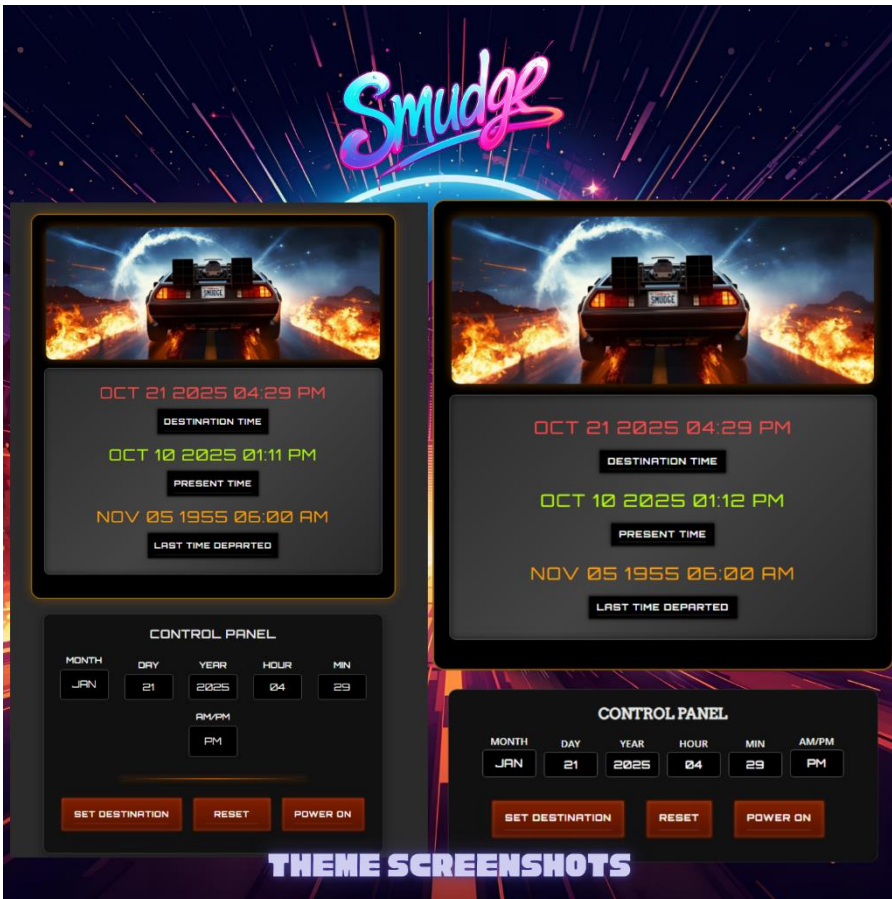

- Default layout is designed for most modern themes.
- Some page builders (like Impreza or Flatsome) may slightly adjust field spacing.
- If alignment looks off, see next page.

Theme Fixes & Troubleshooting

1. When the Control Panel Doesn't Align Properly

Some WordPress themes (like Impreza, Flatsome, or Elementor kits) apply their own CSS rules that affect flexbox or grid layouts.

Try this first:

- Go to **Appearance** → **Customize** → **Additional CSS**
- Add this snippet:

```
.tc-control-panel .picker {

display: flex !important;

flex-wrap: wrap;

justify-content: center;

gap: 10px;

}

.tc-control-panel label {

flex: 1 1 100px;

text-align: center;

}

}
```
